### **Coming Soon – One-Year Complimentary AARP Membership**

On March 1, your members aged 50+ will be able to access an exclusive one-year complimentary membership in AARP! And, there's also a benefit for members under the age of 50 because they can 'pass-along' an AARP membership to someone they know that is age 50+. In this way the benefits of the program can be experienced by any member.

As the nation's leading organization for people age 50 and over, AARP has designed its membership to help everyone age 50+ live their best lives.

**This is being added to your Magellan program at no cost to you or your members.** Having this available through your Magellan program demonstrates your commitment to the health, wellness and work-life balance of your multi-generational workforce.

Through a link on [www.MagellanHealth.com/member](http://www.MagellanHealth.com/member), your members, aged 50+, can receive a one-year complimentary AARP membership. If someone is already an AARP member then an additional year of membership will be added to the end of their existing term.

**PLUS** - If someone is under the age of 50 – they can 'pass-along' an AARP membership to someone they know that is age 50+.

Receiving or passing along this complimentary one-year membership is a one-time benefit. However, memberships can be renewed – at the member's cost – at a discounted rate. AARP's discounted membership rates for this program equal – or is better than – any rate AARP promotes through their own member retention channels. There is no obligation to renew membership once the complimentary one-year term expires.
